PROJECTS

WEATHER APP HTML , CSS , JAVASCRIPT

- Developed a Weather App using JavaScript and the OpenWeather API to deliver detailed weather information, including real-time reports, hourly forecasts, a 5-day outlook, and data on "feels like" temperature and humidity.
- Implemented a user-friendly search functionality to access weather data for any city, enhancing accessibility and providing an intuitive experience.

SPACE EXPLORATION MANAGEMENT SYSTEM | SQL

- Designed and implemented a robust database schema using Microsoft SQL Server for the Space Exploration Management System, facilitating centralized storage and efficient management of mission-critical data including missions, spacecraft, astronauts, and more.
- Developed expertise in SQL through hands-on experience with database design, table normalization, SQL queries (SELECT, JOIN, UPDATE, DELETE), and data manipulation techniques, enhancing proficiency in data management and analysis for space exploration initiatives.
